Subcommittee on Oversight and Investigations		

July 26, 1995

Mr. Serge Vallve
Chief Executive Officer
E5, Incorporated
3333 Brea Canyon Road
Suite 228
Diamond Bar, CA 91765

Dear Mr. Vallve:

I am very pleased with the performance of the Econo Valve that you had installed in my personal automobile. Although my primary interest in using your device is the improvement of air quality, I strongly believe that the dramatic improvement in engine performance that I am experiencing is sufficient reason to install your product.

I am impressed with the increase in power; and, improved response to acceleration and deceleration that I am experiencing. I am even more impressed with the dramatic mileage improvement. I estimate that my Jeep Wrangler Renegade (4L engine) was getting about 10 miles to the gallon before your device was installed. I am now getting anywhere from 18 to 22 miles to the gallon, city driving. Its difficult to estimate the actual mileage because the engine seems to be getting better all the time. I know enough about automobiles to know that the engine is breathing; and, that the continuous improvement in performance could be coming from the cleaner operation.

I wish you the best in your new venture. I would be interested in hearing of your progress. I suspect that this one device could substantially improve engine performance and at the same

time help to clean the air we breath. I wholeheartedly support this strategy because it can accomplish both ends.

Congratulations!

Sincerely,

SIGNED

MATTHEW G. MARTINEZ

Member of Congress
