To Whom It May Concern:

My name is Alex Stoeber, sales manager at Huntington Beach Ford. Approximately two months ago, I had the Dyno Valve installed on my personal truck. It is now that I believe the true value of the Dyno Valve. My truck has a 26 gallon gas tank and was getting about 310 miles per full tank of gas. After the installation of the Dyno Valve and having the carbon cleaned out, my truck is getting approximately 400 miles per full tank of gas. I believe in this product so much that we have begun to install the valves on our used vehicles here at the dealership. Before accepting the Dyno Valve, I did some research through Ford Motor Company's warranty service to ensure that the installation of the valve would not void any factory warranty. I was assured that the warranty would not be voided by this installation.

Sincerely,

A handwritten signature in blue ink, appearing to read "Alex Stoeber". The signature is fluid and cursive, with a long horizontal stroke at the end.

Alex Stoeber

Sales Manager
