

Pegasus Carriage

Long Beach, CA

Joan Macomber, Owner and Operator

January 13, 2012

Thank you DynoValve for saving me over \$35,000! When my 1996 Toyota T-100--with over 200,000 hard miles-- would not pass smog I purchased what seemed like a 'too good to be true' DynoValve. The results have been amazing. Not only did my 4x4 truck pass smog with results better than today's new 'economy' cars, but the truck has more pep.

The DynoValve more than paid for itself in the first 2 months as now rather than purchasing gas every 4 days for my rush hour drive into downtown Los Angeles I only need to fill- up my tank about every 4 days! My truck now has more 'getty-up', to tow my company horse and carriage trailers.

My family uses the DynoValve in their hard working construction company truck fleet and we are gradually having them installed in all of our family and work vehicles.

The DynoValve is truly mankind's needed miracle to help turn around our global warming crisis. Built and installed by truly brilliant engineers that treat clients with kindness and respect, they are making a difference for the future today.

High regards,

A handwritten signature in blue ink that reads "Joan Macomber". The signature is written in a cursive, flowing style.
