Mike Dummett

Subject: DynoValve Installation

I appreciate you introducing the DynoValve to me and my staff at Stallings Police Department.

With the initial test on my 2010 Ford Crown Vic Patrol vehicle I noticed an immediate increase in acceleration after it was installed. My average mileage went from 19 mpg to 25mpg which is roughly 31% improvement on my 1st 2 tanks of fuels which was primarily highway mileage.

After my initial test I authorized the purchase of DynoValves for my entire fleet of 25 patrol vehicles in April 2011. I truly appreciate you and Ryan's continued support and regular visits by providing us scanner test results on our patrol vehicles and keeping me updated on improvements.

These test results have provided invaluable data for our City driven Patrol vehicles that revealed total idle time which is important to improve mpg.

The latest improved 144 DynoValve installed last week on our fleet has revealed even greater results. The test on Rodney's Patrol vehicle showed a 2.3 mpg improvement from 12 mpg City driving to 14.3 mpg which is a 19.2% improvement.

Again thanks for your assistance in helping us reduce operating cost on our fleet of vehicles.

Best Regards,

Mike Dummett  
Chief of Police
